Projects

Lacks (Rails, React, JavaScript, PostgreSQL)

[live](#) | [Github](#)

- Integrates Pusher API and web sockets for real-time messaging and channel updates
- Allows GIF posts with custom AJAX requests to the Giphy API filtered by tag name
- Uploads images to the cloud using AWS S3 for secure and scalable asset storage
- Performs specialized CRUD functions with custom SQL queries and Rails controller routes

Conway's Game of Life Simulator

[live](#) | [Github](#)

- Incorporates jQuery and vanilla Javascript for rendering cells
- Buttons and game controls created using Canvas

HackeyQuery

[live](#) | [Github](#)

- A JavaScript DOM manipulation library that simplifies methods such as .add, .delete, .child
- Allows setting and removal of event listeners and event delegation
- Simplifies HTTP requests by transforming JSON data into plain Javascript objects

Skills

Ruby | Ruby on Rails | RSpec | JavaScript | jQuery | ReactJS | Redux | SQL | Git | HTML5 | CSS
